ENGINEERING EXPERIMENT STATION

ATLANTA, GEORGIA 30332

July 1, 1981

Mr. Lynn S. Wallis  
Iowa Power & Light Co.  
823 Walnut Street  
P. O. Box 657  
Des Moines, Iowa 50303

Subject: Completion of Project A-2984, Presentation of Industrial Hygiene/Occupational Health Information at Council Bluffs Power Station Employee Meetings

Dear Lynn:

This is to acknowledge completion of the above subject project and to summarize the results. Presentations of industrial hygiene/occupational health information were made at each of five employee meetings held at the Council Bluffs Power Station. The meetings were held as follows:

Tuesday, July 23, 1981 7:30 AM, 2:00 PM, and 3:00 PM

Wednesday, July 24, 1981 3:00 PM and 10:00 PM

The information presented at each meeting consisted of a description of industrial hygiene instrumentation and sampling procedures, a summary of the results of the industrial hygiene survey conducted in February, 1981, and some discussion of potential health hazards associated with coal dust and fly ash. Information was presented and a demonstration performed to show that there is not a significant amount of radioactivity present in the coal and ash at CBPS to present any radiation hazard to the employees.

I have enclosed copies of the overhead transparencies which were used in the meetings. If we can be of further assistance to you and Iowa Power & Light Co., please do not hesitate to call.

Respectfully,

James L. Burson, Program Manager  
Occupational Safety and Health  
Consultation Program
